

Dong Xu 3 Axle 40ft Flatbed Semi Trailer

Structural Design: This semi-trailer typically consists of a flat cargo bed and three independent axles. The flatbed design provides a spacious loading area, allowing it to transport various large items such as machinery, construction materials, and vehicles with ease.

Load Capacity: With three axles, the three-axle flatbed semi-trailer offers greater load capacity and stability. The three axles distribute the weight more evenly, which helps to reduce stress on the road surface, minimize ground damage, and enhance driving stability.

Application Range: This semi-trailer is particularly well-suited for long-distance and heavy-load transportation. It is commonly used for transporting large equipment, construction tools, or other oversized items. Additionally, the flatbed design simplifies the loading and unloading process, eliminating the need for specialized equipment to handle complex cargo.

Product	3 Axle 40ft Flatbed Semi Trailer
Type	Semi Trailer
Max Payload	>30000 kg
Size	12500*2500*1550 mm
Axle	3 Axle 13Ton / 16Ton Fuwa
Suspension	Mechanical Suspension / Air Suspension
Landing Gear	28Ton Two Speed JOST
King Pin	2"(50mm) or 3.5"(90mm)
Twist Lock	4-12 Sets
Tire	12R22.5
Material	Steel
Function	20' 40' Container & Cargo Transporting

PS: All the parts of the trailer can be customized
