

Dong Xu 3 Axle Concrete Mixer Semi Trailer

The Dong Xu 3 Axle Concrete Mixer Semi Trailer is a specialized vehicle used for transporting concrete. It can carry more concrete in a single trip, thereby reducing pouring time and improving pouring efficiency. It offers greater stability: the overall length of the semi-trailer is longer than that of a standard truck, and the wheelbase between the tractor and the trailer is also longer, making the vehicle more stable when driving and turning. In contrast, traditional trucks have a shorter wheelbase and a higher center of gravity, which increases the likelihood of losing control or tipping over during sharp turns or emergency maneuvers. The 3-Axle Concrete Mixer Semi-Trailer is more suitable for medium to long-distance concrete transport, such as in underdeveloped countries or areas where the construction of commercial concrete stations is restricted due to pollution concerns. It is not hindered by muddy terrain, and its advantages of large carrying capacity, long transport distances, and high-speed stability can be fully utilized.

Product name	Dong Xu 3 Axle Concrete Mixer Semi Trailer
Type	Semi-Trailer
King pin	2"(50mm)or3.5"(90mm)
Leaf Spring	90(W)mm*13(Thickness)mm*10(Layer)
Landing Gear	JOST/FUWA/Yahua Brand 28T
Axle	13 Ton Fuwa Brand
Suspension	Mechanical Suspension
Tire	12r22.5
Capacity	25m ³ -60m ³
Rim	9.00-22.5
Material	Stainless Steel
Function	Mix concrete or others

PS: All the parts of trailer can be customized.
