

Dong Xu 3Axles Wood Log Semi Trailer

Dong Xu 3Axles Wood Log Semi Trailer play an significant role in the logging and forestry industry, efficient transport of timber from the forest to the mill is crucial. The 3-axle wood log trailer stands out as a vital piece of equipment designed to meet this need. Its robust construction and versatility make it an indispensable asset for loggers and timber companies alike.

The 3-axle wood log trailer is engineered for heavy-duty performance. Its three-axle configuration provides enhanced stability and weight distribution, which is essential when carrying large and heavy loads of logs. This design helps in minimizing tire wear and ensures a smoother ride, reducing the risk of damage to the logs and the trailer itself.

Typically, these trailers are constructed from high-strength steel or aluminum, ensuring durability and longevity. They feature adjustable log cradles or bunks that can be modified to accommodate logs of varying lengths and diameters. Additionally, the trailer often includes hydraulic systems for easy loading and unloading, which significantly improves efficiency and safety on the job site.

Product	Dong Xu 3Axles Wood Log Semi Trailer
Type	Semi Trailer
Size	12500*2500*3260 (mm)
Sidebar	16pcs
Axle	3Axle / 4Axle 13Ton Fuwa / ZhengYang Brand
Suspension	Mechanical Suspension
Landing Gear	JOST
King Pin	3.5"(90mm)
Brake System	WABCO Valve
Material	Steel
Function	Wood Transporting

PS: All the parts of the trailer can be customized
