

## Dong Xu 4Axle Removable Goose-neck Semi Trailer

The Dong Xu 4Axle Removable Goose-neck Semi Trailer is a transport vehicle with a specific structure and characteristics. This type of semi-trailer typically features a recessed beam frame, with the front section having a goose-neck design. The middle section serves as the cargo platform, and the rear end is equipped with the wheel assembly. The detachable goose-neck design allows for greater flexibility when loading cargo. It enables the separation of the goose-neck from the trailer, allowing the front of the vehicle to come into contact with the ground, making it easier to load large machinery or other cargo from the front. Once loading is completed, the trailer can be restored to its normal transport position.

In practice, the 4-axle detachable goose-neck semi-trailer is commonly used for transporting heavy machinery, large objects, and other cargo that require special handling, making it an essential tool in industries that involve oversized or special cargo transportation.

Product name	Dong Xu 4Axle Removable Goose-neck Semi Trailer
Type	Semi-Trailer
Max Payload	>50000 kg
Size	11500*2500*3800mm
King pin	2"(50mm)or3.5"(90mm)
Leaf Spring	90(W)mm*13(Thickness)mm*10(Layer)
Landing Gear	JOST/FUWA/Yahua Brand 28T
Axle	13 Ton Fuwa Brand
Suspension	Mechanical Suspension
Tire	12r22.5
Capacity	25m <sup>3</sup> -60m <sup>3</sup>
Rim	9.00-22.5
Material	Steel
Function	Container or equipment

PS: All the parts of trailer can be customized.
