

DongXu Three Axle Side Dump Semi Trailer

Dong Xu Three Axle Side Dump Semi Trailer is a specialized type of semi-trailer designed for transporting and dumping heavy and bulk materials, such as sand, gravel, and demolition waste. Unlike traditional rear dump trailers, the side dump trailer unloads materials by tilting the bed to one side. This feature allows for faster, safer, and more controlled dumping, even on uneven surfaces. The side dump feature offers several advantages. It allows for quick and efficient unloading, saving time and labor. Operators can simply tilt the trailer to one side, enabling the contents to be discharged neatly and accurately. This not only increases productivity but also reduces the risk of damage to the cargo and the surrounding area.

Furthermore, these trailers are built to withstand the toughest conditions. They are equipped with high-quality components and durable materials, ensuring long service life and minimal maintenance. With their reliable performance, they can be trusted to transport materials over long distances and on various terrains.

In conclusion, the three axle side dump semi trailer is a game-changer in the field of material transportation. Its combination of strength, functionality, and efficiency makes it an essential asset for businesses in need of reliable and effective hauling solutions.

Product	DongXu Three Axle Side Dump Semi Trailer
Type	Semi Trailer
Max Payload	>30000 kg
Size	12500*2500*2700 (mm)
Axle	Fuwa
Suspension	Mechanical Suspension
Tire	12r22.5
Landing Gear	28t Heavy Duty Landing Gear
King Pin	2"(50mm) or 3.5"(90mm)
Brake System	WABCO Valve
Material	Steel
Function	Building Material / Agriculture Products Transporting

PS: All the parts of the trailer can be customized
