

Curtain Side 13.6M 4 Axle Semi Trailer for Sale

The Curtain Side Semi Trailer is a type of truck trailer used for transporting goods, designed with flexible side curtains instead of rigid walls. The curtains are made from heavy-duty tarpaulin material, which can be slid open and closed, allowing for easy side access during loading and unloading. This design provides the flexibility of a flatbed trailer, while offering protection from weather like an enclosed trailer.

The key benefits of a curtain side trailer include:

1. Quick and easy access: Loading can be done from the sides, reducing the time it takes compared to using traditional trailers.
2. Weather protection: Goods are shielded from rain, wind, and other environmental elements.
3. Efficiency: It can be loaded and unloaded with a forklift from the side, making it ideal for palletized freight.

This type of trailer is commonly used in industries like logistics, retail, and construction for transporting a wide variety of cargo.

DongXu Vehicle, as a lead manufacturer of the semi trailer in China, can provide every kinds of curtain side semi trailer for your cargo transportation.
