

Heavy Duty Removable Goose Neck Semi Trailer

The goose-neck part is a unique structure at the front section of the semi-trailer frame. Its shape is similar to the neck of a goose, presenting a certain curved arc. This design enables the semi-trailer to better adapt to the height and driving angle of the tractor when connected, achieving a smoother towing connection.

The goose-neck structure can effectively reduce the loading platform height of the semi-trailer, facilitating the loading and unloading of goods. Especially for some large and heavy goods, a lower loading platform can reduce the difficulties and risks during the loading and unloading process. At the same time, during driving, the gooseneck structure can play a role in buffering and dispersing stress, improving the driving stability and safety of the semi-trailer.

Product name: Removable Goose-neck Trailer

Type: Semi-Trailer

Max Payload: >50000 kg

Size:11500*2500*3800mm

King pin: 2"(50mm)or3.5"(90mm)

Leaf Spring:90(W)mm*13(Thickness)mm*10(Layer)

Landing Gear: JOST/FUWA/Yahua Brand 28T

Axle:13 Ton Fuwa Brand

Suspension: Mechanical Suspension

Tire:12r22.5

Rim: 9.00-22.5

Material: Steel

Function: Container or equipment
