

Tri Axle Container Transport Flatbed Semi Trailer

The Tri Axle Container Transport Flatbed Semi Trailer is a common piece of equipment in modern logistics, specifically designed for transporting standard containers.

This type of semi trailer offers efficient and stable transport capabilities, making it well suited for long distance cargo transport and multimodal shipping, including sea land operations. The tri axles design provides excellent load-bearing capacity and safety, securing its important position in the logistics industry.

The Tri Axle Container Transport Flatbed Semi Trailer is composed of key components such as the chassis, support device, kingpin, suspension system, and tires. Its chassis is specifically designed as a flatbed structure, capable of securely carrying 20ft, 40ft, or 45ft standard containers. The tri axles are distributed at the rear of the trailer, ensuring the vehicle's balance and stability while effectively distributing the weight of the cargo, thus preventing safety hazards caused by overloading.

With its strong load bearing capacity and ability to handle complex road conditions, the Tri Axle Container Transport Flatbed Semi Trailer has become indispensable in the container transport industry. Whether in sea shipping, road transport, or intermodal logistics, it provides efficient and safe transportation solutions for cargo.

DongXu Vehicle, as a lead manufacturer of the semi trailer in China, can provide every kinds of flatbed semi trailer for your container transportation.

Trailer Name: Tri Axle Container Transport Flatbed Semi Trailer

Trailer Type: Semi Trailer

Max Payload: More Than 30 Tons

Size: 12500mm*2500mm*1500mm

Axle: 3 Axle 13/16 Ton Fuwa

Suspension: Mechanical Suspension / Air Suspension

Landing Gear: JOST

King Pin: 2"(50mm) or 3.5"(90mm)

Twist Lock: 4-12 Sets

Function: Container Transporting

All the parts can be customized as your requirements.
